

St. Paul Road Construction Update

Final year of I-94&I-35E construction underway in St. Paul. Traffic restrictions may cause delays in travel to Back to the Fifties.

The second year of construction on the I-94 & I-35E project in St. Paul began in mid-April. This year's work is on Interstate 94 between Marion Street and Mounds Boulevard and on Interstate 35E between I-94 and University Avenue. Construction will reduce capacity to two lanes in each direction and require long-term closures of ramps into and out of downtown St. Paul. The construction schedule is subject to change. Updated information will be provided in email alerts and on the project website.

The two-year project to repair and resurface I-94 between Western Ave. and Mounds Blvd. and I-35E between I-94 and University Ave. in St. Paul began in the summer of 2021. Project work also includes resurfacing ramps and frontage roads along I-94, repairing drainage and upgrading storm sewers and bridge rehabilitation work as well as repairing sidewalks and upgrading pedestrian sidewalks and approaches to Americans with Disability Act (ADA) standards.

The project is expected to be completed in the fall 2022.

For more information and to sign up for project emails, please visit the I-94&I-35E in St. Paul project webpage at www.mndot.gov/metro/projects/i94-i35e-stpaul/index.html.
